Measure

simply pour to desired marks

Read

stepped pre-measured levels at
 $\frac{1}{2}$, 1, $1\frac{1}{2}$ and 2 ounces

View

measured steps are visible from
top or sides

"The EZ Step Jigger is a great tool. If people understand it, they buy it. So easy to use, it's an essential item to have in your kitchen or bar, and functions great in the garden or any place you need to measure. Customers come into our store and buy the EZ Step Jigger by the dozens. Once we were out of stock for a short time, and customers would ask for the product every week."
