Harold Import Gets a Grip with Silicone Kitchen Grips by Lékúé

MAY 5, 2005 — Harold Import Company introduces the latest and hottest silicone product from the world's leading manufacturer of silicone bakeware — Silicone Kitchen Grips from Lékúé. These innovative grips protect your hands from contact with heat sources in the kitchen such as oven, microwave, grill, pots and pans. They also insulate hands against boiling water, hot oil or fat. The unique flexible non-slip grip makes transporting hot dishes, mugs, pots or other cooking vessels easy and secure. Best of all – they fit either right or left hands.

Made of 100% platinum-process silicone, the grips are FDA approved for use with food and withstand temperatures ranging between -76°F and 572°F. They are also easy to clean with warm water and mild soap or dishwasher safe and will not stain, fade or deteriorate in contact with heat. Kitchen Grips are available in lively Fuchsia, Pistachio, Royal Blue and Tangerine colors.
