The Skoy Cloth—An eco-friendly and economical alternative to paper towels

FEBRUARY 2, 2010

Harold Import Company—HIC adds another innovative item to their long list of earth-friendly products—The Skoy Cloth. Made in Europe, this economical alternative to paper towels is 100% biodegradable and made of all-natural cotton and wood-based cellulose pulp—as earth friendly as it can be. Even its bright colors are water based and the manufacture process is chlorine free. In an independent composting test, Skoy broke down completely within 5 weeks.

The Skoy Cloth is reusable. Simply toss it in the washing machine or dishwasher to clean between uses. Skoy dries quickly keeping it free of bacteria—no more smelly sponges. Skoy is highly absorbent and can hold 15 times its own weight. One Skoy Cloth can do the work of up to 15 rolls of paper towels and can last for months under regular use in a standard home environment. It's also a great replacement for sponges and wash cloths.

With its durability and green construction, The Skoy Cloth is the smart choice for both your pocket and the environment.

SRP: \$6.99
