HIC - Harold Import Company Spice Ratchet

MAY 14, 2008

The uniqueness of Spice Ratchet's ceramic mechanism is in the ratcheting action and the coarse/fine adjustment that stays in-place until you decide to change it. Spice Ratchet's smooth operation produces uniform results every time.

Spice Ratchet is proud to be associated with Harold Import Co., Inc bringing our *New York Collection* to the US market. This collection is designed by our in-house **Danish Designer – Mr. Kenneth Ammitzbøll** with the following in mind.

- 1. Durability -versus- Environment:** Our *New York* mill is made from ABS + Polycarbonate (safety glass material). These materials give the mill durability. This *New York* mill can also be placed into the dish washer for cleaning before another use, to avoid the waste of those “one-time-use” grinders and save the environment.
- 2. Creativity and Organization:** To create your own seasoning nowadays with organic & healthy eating in mind, our *New York* mill's clear frosted body provides easy visual recognition of your spices. This compact design is a great way to store & organize seasonings. It fits into your spice drawers or cabinets.
- 3. Spice up your Baking:** The *New York* mill is not only for grinding pepper corns. It also works with sea salt, cumin seeds, Herbs de Province, cinnamon chips, sugar crystals, coffee beans, cloves and more ... also; due to the durability of our *New York* mill, it can even be used for kids' baking parties. Grinding colored sugar crystals or crushing jolly rancher candies adds real flavor to cookies or cup cakes. Make your desserts taste better!
- 4. Right -versus- Left:** Spice Ratchet Mills mechanism's back & forth operation works not only for right-handed persons. It also performs equally well when operated by left-handed persons.

SRP is \$11.99
