HIC – Harold Import Company Spices It Up with Spice Ratchet

MAY 15, 2008

HIC – Harold Import Company brings Spice Ratchet's *New York Collection* to the US market; created by famed Danish designer Mr. Kenneth Ammitzbøll with the following in mind:

Durability -versus- Environment: the *New York* mill is made from ABS and Polycarbonate (safety glass material). These materials give the mill durability. This *New York* mill can also be placed into the dish washer for cleaning before another use, to avoid the waste of those "one-time-use" grinders and save the environment.

Creativity and Organization: To create your own seasoning nowadays with organic and healthy eating in mind, the *New York* mill's clear frosted body provides easy visual recognition of your spices. Its compact design is a great way to store & organize seasonings. It fits into your spice drawers or cabinets.

Spice up your Baking: The *New York* mill is not only for grinding pepper corns. It also works with sea salt, cumin seeds, Herbs de Province, cinnamon chips, sugar crystals, coffee beans, cloves and more ... also; due to the durability of the *New York* mill, it can even be used for kids' baking parties. Grinding colored sugar crystals or crushing jolly rancher candies adds real flavor to cookies or cup cakes. Make your desserts taste better!

Right -versus- Left: Spice Ratchet Mills mechanism's back-and-forth operation works not only for right-handed persons. It also performs equally well when operated by left-handed persons.

The uniqueness of Spice Ratchet's ceramic mechanism is in the ratcheting action and the coarse/fine adjustment that stays in-place until you decide to change it. Spice Ratchet's smooth operation produces uniform results every time.

SRP: \$11.99
