Harold Import Warms Things Up

JULY 5, 2007 — Harold Import Company announces the arrival of The Warming Pitcher — the perfect solution for serving warm liquids. The double walls are extra-insulating and keep the heat in while serving melted butter, cream, milk, maple syrup, gravy, au jus and even sake.

It's easy to use. Simply fill the handle with water, microwave for 30 to 90 seconds, place the cork back on the end of the handle and fill the well of the pitcher with your favorite warmed liquid. Water poured into the handle never mixes with contents in the well of the pitcher. Serve directly from the microwave to the table.

The six-ounce pitcher is constructed of fine porcelain and is dishwasher-safe. SRP \$9.99.
